

ADEMCO, INTERNATIONAL
Miami, Florida

This project was constructed for a security equipment subsidiary of Honeywell. Tilt-up construction was selected as the most cost effective means to achieve the functional and architectural goals of the client. The color palette, landscaping and architectural detailing enhance the south Florida look in this light industrial facility.

The Miami / Dade County location presented challenges from a regulatory perspective and required the design team to achieve stringent hurricane standards. As is typical in this area, all storm water is managed on site to maintain groundwater recharge.

Facility Type	Office / Warehouse
Client	Ademco, International
Size	50,000 s.f.
