

**LITTLE RIVER CASINO & RESORT**  
 MANISTEE, MICHIGAN

*This 224,000 s.f. gaming resort was designed with the extensive use of wood and stone details to create the northern lodge feel. Structural timber frames were utilized in the 45 foot high lobby entrance which is accentuated by a full height stone fireplace. The lodge feel carries through to the one hundred room hotel wing with lighting, color and wood details consistent with the gaming and convention center areas.*

*The building mechanical systems were enhanced to provide sufficient air changes and cooling capacity to maintain clientele comfort on the busy 48,000 s.f. gaming area. The casino has a design capacity of 1,500 slot machines and fifty gaming tables.*

*Other amenities include an indoor pool/jacuzzi room, day care center, multiple restaurant and bar areas and a recreational vehicle park with capacity for 45 campers. This was the third project completed for the owner with a 19,500 s.f. interim casino and a subsequent expansion completed during the previous two years.*
